NH DHHS COVID-19 Update – April 7, 2021

Concord, NH – The New Hampshire Department of Health and Human Services (DHHS) has issued the following update on the new coronavirus, COVID-19.

On Wednesday, April 7, 2021, DHHS announced 434 new positive test results for COVID-19, for a current PCR test positivity rate of 2.5%. Today's results include 258 people who tested positive by PCR test and 176 who tested positive by antigen test. There are now 3,387 current COVID-19 cases diagnosed in New Hampshire. Of the results reported today:

• 4/6: 434 new cases

Several cases are still under investigation. Additional information from ongoing investigations will be incorporated into future COVID-19 updates. Of those with complete information, there are one hundred individuals under the age of 18 and the rest are adults with 49% being female and 51% being male. The new cases reside in Rockingham (118), Hillsborough County other than Manchester and Nashua (69), Strafford (49), Merrimack (42), Grafton (28), Belknap (18), Carroll (18), Cheshire (15), Coos (6), and Sullivan (1) counties, and in the cities of Manchester (25) and Nashua (23). The county of residence is being determined for twenty-two new cases.

Community-based transmission continues to occur in the State and has been identified in all counties. Of those with complete risk information, most of the cases have either had close contact with a person with a confirmed COVID-19 diagnosis or have recently traveled.

DHHS has also announced one additional death related to COVID-19. We offer our sympathies to the family and friends.

• 1 male resident of Rockingham County, 60 years of age and older

There are currently 96 individuals hospitalized with COVID-19. In New Hampshire since the start of the pandemic, there have been a total of 86,935 cases of COVID-19 diagnosed.

² Doses distributed are the number of first and second doses that the site has ordered and received at their location. Orders are based on clinic schedules and average uptake of vaccine by participants.

³ Doses administered may exceed the number of doses distributed due to the ability to get extra doses out of a vial, depending on the type of syringe used.

⁴ Includes the single-dose Janssen Biotech vaccine.

⁵ Includes the 2-dose Pfizer BioNTech and Moderna vaccines.

^{*} The LTCF PPP is a federal program that sends pharmacies into LTCF to vaccinate residents and staff. In order for LTCF to access this program in New Hampshire, NH DHHS was required by the CDC to allocate a fixed number of doses to guarantee that pharmacies would have enough vaccine to complete vaccination administration within a four-week time frame. This program remains on schedule as originally anticipated and will be continually monitored to ensure completeness.

^{**}Retail Pharmacy: Includes doses allocated to the State of NH that were distributed to a Pharmacy in addition to doses allocated directly from the federal government to the federal retail pharmacy partnership program.
